

30m QRSS beacon: QRV2: Reports: Week1

Written by Hans Summers

Saturday, 13 June 2009 05:24 - Last Updated Saturday, 13 June 2009 05:39

The first report was from Vic G3GKI in the morning on 26-Aug-04. He reported strong signals but the frequency was lower than expected, at 10,139,942. He didn't have time to get any screenshots.

First screenshot was received from Steinar LA5VNA in JO59JQ, 27-AUG-04 09:39 UT. It shows "G0U" i

A little later, this arrived from Steinar LA5VNA showing my "crown" trademark (also upside down).

28-AUG-04 19:45 UT: Uli DF5SF in JN48ON reports strong signals, and sends this image at 20:05.

First screenshot from Peter PA1SDB in QTH JO33KH Appingedam, 29-AUG-04 06:54 UT. Shows the e

First screenshot from Wolf DL2WRJ on 29-AUG-04 09:00 UT, showing again the "crown" trademark.

Nice detailed info from Peter PA1SDB showing the crown and interesting frequency measurements. The

More from Peter PA1SDB, from Sunday night (29-AUG-04 - 30-AUG-04). Peter was using a 45cm diam

Another from Peter PA1SDB: the "crown" again
